MEDIA RELEASE

Keppel Data Centres and Quann partner on end-to-end enterprise cyber security solutions
Strategic partnership leverages both Quann's and Keppel Data Centres' expertise

SINGAPORE, 19 July 2016 – Keppel Data Centres Holding Pte Ltd (Keppel Data Centres), a subsidiary of Keppel Telecommunications & Transportation Limited (Keppel T&T) has partnered Quann, a homegrown Managed Security Services Provider and a business unit of Singapore's leading security organisation Certis CISCO, in a strategic collaboration. The partnership will allow Keppel Data Centres' customers to benefit from a range of holistic cyber security solutions provided by Quann that covers consultancy, network protection and monitoring, and incident response. This is in line with Keppel Data Centres' commitment to expand its value-added services to customers and concurrently allows Quann to expand the reach of its offerings beyond its customer base.

Under the terms of the collaboration, customers colocating in facilities managed by Keppel Data Centres will be able to leverage Quann's end-to-end security services which include **Quann Security-as-a-Service**, a pay-as-you-use utility model covering DDOS protection, DNS security and web application protection; **Quann Security Operations Centre (SOC)-as-a-Service**, a 24x7 security monitoring service which operates on the company's proprietary technologies providing real-time, advanced threat detection and big data analytics to swiftly alert clients of both known and unknown threats; **Quann Consultancy Services**, offering vulnerability and risk assessments along with customised security roadmaps; **Quann's Computer Emergency Response Team (CERT)**, cyber attack incident responders who can rapidly identify the full scope of the breach, eradicate the threats behind it and set remediation measures to prevent reoccurrence; and **Quann's Plan-Build-Operate SOC**, which allows Keppel Data Centres' customers to build SOCs tailored for specific business requirements.

Availing some of these services on a pay-as-you-use utility model will enable hosting customers to achieve cost and operational efficiencies as this eliminates the need for physical infrastructure investment and provides deployment flexibility and scalability depending on their business needs.

The partnership takes effect in August 2016 and will, starting with Singapore, cover regions where both Keppel Data Centres and Quann operate.

Mr Wong Wai Meng, CEO, Keppel Data Centres said, "Staying one step ahead in cyber security is an increasingly important agenda item for businesses in today's digital economy. In addition, they face pressures from growing data storage requirements, IT scalability, to controlling operational expenditure and energy efficiency. The

partnership with Quann marks another step in Keppel Data Centres' commitment to provide one stop, value-added solutions that give our customers ease of mind as they host their mission-critical systems with us."

Mr Foo Siang-tse, Managing Director of Quann said, "Quann is in an excellent position to deliver the holistic cyber security solutions that Keppel Data Centres' large enterprise customers require. By combining cutting-edge technologies with the skills, insights and experience of our cyber security professionals, we are able to provide data centre customers with comprehensive, curated and customised security solutions. These are underpinned by robust processes and resilient infrastructure."

"This synergy provides our customers with the best of worlds – effective data centre hosting and cyber security solutions," he added.

The partnership comes at a time when cyber threats are evolving at a rapid pace, making it imperative for enterprises to ensure the security of their digital environments. An Asia Pacific report from Micro Market Monitor reveals that the Asia Pacific cyber security market is projected to grow from US\$ 17.19 billion in 2015 to US\$ 30.39 billion by 2020.

About Keppel Land Ltd
One of Asia's premier property companies, Keppel Land, a subsidiary of Keppel Corporation Limited, is recognised for its sterling portfolio of award-winning residential developments and investment-grade commercial properties as well as high standards of corporate governance and transparency.

The Company is geographically diversified in Asia, with Singapore and China as its core markets as well as Indonesia and Vietnam as its growth markets.

A leading prime office developer in Singapore, Keppel Land contributes to enhancing the city's skyline with landmark developments such as Marina Bay Financial Centre, Ocean Financial Centre and One Raffles Quay.

The Company is committed to grow its commercial portfolio in key Asian cities. Its portfolio of overseas commercial properties includes Park Avenue Central and Life Hub @ Jinqiao in Shanghai, a Grade A office development in Beijing and Seasons City in the Sino-Singapore Tianjin Eco-City, China, Saigon Centre in Ho Chi Minh City,

Vietnam, International Financial Centre Jakarta in Indonesia, the SM-KL Project Phase 2 in the Philippines as well as Junction City Tower in Yangon, Myanmar.

Beyond Asia, the Group has acquired an office building in London, United Kingdom. To strengthen Keppel Land's retail capabilities, the Group has acquired a 75% stake in retail management company, Array Real Estate, which has been renamed Keppel Land Retail Management Pte Ltd.

Keppel Land is Asia's premier home developer with world-class iconic waterfront residences at Keppel Bay and Marina Bay in Singapore. The Group has also ventured into the United States with a residential development in Manhattan, New York.

With a pipeline of about 70,000 homes in Singapore and overseas as well as an increasing commercial presence in the region, Keppel Land is well-positioned to meet the growing demands for quality residential, office and mixed-use developments.

About Quann
Quann, formerly known as e-Cop, is a homegrown cyber security services provider and a business unit of Singapore's leading security organisation, Certis CISCO.

Quann has been in the cyber security business for over 15 years, and has evolved from being a Managed Security Services Provider serving Singapore-based enterprises and government agencies, to a leading regional cyber security services provider with an extensive Asian footprint. It is currently one of the largest cyber security service providers with multiple ISO/IEC 27001 certified, in-country next-generation Security Operations Centres (SOCs) in Asia that help organisations detect, prevent and respond to cyber threats. Quann's next-generation SOCs operate on its proprietary patented technologies which provide real-time, advanced detection and big data analytics to swiftly alert clients to both known and unknown threats. Quann's circle of protection delivers end-to-end cyber security solutions that prevent, detect and rapidly respond to cyber attacks through its four service pillars – consult, empower, protect and rescue.

The company is headquartered in Singapore and has regional offices in Malaysia, Hong Kong, Thailand and India. It has a workforce of over 300 certified security professionals with the skills and knowledge in designing, validating and managing security solutions, as well as providing incident response and forensic analysis.
